

WELCOME TO **The LONIX TRADES**

*CORPORATION & LONIX TOKEN A DUBAI BASED
DECENTRALISED PLATFORM*

WHAT IS SMART CONTRACT

A Smart Contract is a self-executing digital agreement encoded in code, operating on blockchain platforms like Ethereum. It automates contract enforcement, enhancing transparency, security, and efficiency by eliminating intermediaries. Widely used in sectors like finance and supply chain management, smart contracts streamline processes and build trust through decentralization. However, they also face challenges, such as code vulnerabilities and legal complexities.

ADVANTAGES OF SMART CONTRACT

A Smart Contract will make the LNx TOKEN Affiliate Program unique by automating transactions, ensuring transparency, and eliminating intermediaries. This boosts security, reduces fraud, and streamlines operations, distinguishing LNx TOKEN from centralized platforms.
